

Medical Crisis Preparedness Curriculum Development

Project Title	Medical Crisis Preparedness Curriculum Development
Project Summary	Assist in the development of curriculum to prepare High Threat Diplomatic Missions to plan for and respond to mass-casualty producing incidents (MCI).
Country	United States
Agency	Department of State
DoS Office	MED/DMD/OM/SMP
Post	N/A
Section	N/A
Number of Interns	3

Project Description

This project is designed to be an enduring professional education program that addresses preparedness planning and training. There are three pillars of preparedness that the program will focus on for the curriculum:

- Leadership engagement to standardize incident management efforts for Dept of State to MCI.
- Ensuring that non-medical staff can competently respond to life threatening trauma
- Ensuring the medical professionals assigned to a diplomatic mission can competently respond to trauma casualties

The training will be conducted worldwide and while the goal is to have standardized objective based curriculum it needs to be adaptable to non-english speaking audiences. The audience may include Americans assigned to a diplomatic mission, locally employed staff, other partner diplomatic missions, non-medical participants from local international schools that service children of diplomatic personnel.
